New Jersey's Finest
Award 1999
(One of the top 25
companies in NJ)

Approved by New
Jersey Department of
Education

You either have IT, or you don't!

PC AGE's Computer Aptitude Test can tell in just 30 minutes if you
qualify for a computer career. And it's Free!

Computer Aptitude Test (CAT)

- Why take CAT?
- What is CAT?
- What does CAT measure?
- Sample CAT
- How can I take CAT?
- Register now to take CAT!

If you already have a user ID
and password, click here to
take the test.

To get user ID and password,
see "How can I take CAT?"

Why take CAT?

Take this self-assessment test to find out if you have the aptitude to
become a successful computer or IT (Information Technology)
professional.

If you are already an IT professional, take CAT to find out if you have
the aptitude for higher level professions in the IT industry.

What is CAT?

This test was designed to measure your aptitude for working with
computers. This means that it will show how well you can follow
instructions, obey rules and procedures, and solve problems. It has
nothing to do with how much you know about computers, so if you're
new to them, don't worry! You might still do very well on this test.
Even if you don't score as high as you would have liked, that doesn't
mean that you are incapable of using a computer or even working in
the computer field—only that you'll probably have to work harder at it
than someone who scores higher.

What does CAT measure?

This test measures your analytical and problem-solving skills. It also
measures how logically you think, how much attention you pay to
details, and how closely you follow rules. These skills are required for
computer professions such as Systems Analyst, Programmer, Network
Manager, Network Engineer, Network Administrator, and PC/Network
Technician. These are not the only skills needed for these positions. As
with other professions, you also need motivation, integrity,
productivity, and the ability to communicate, work in a team, follow
instructions, and manage your time.

This test measures your natural aptitude for computers and
problem-solving. It does not test your other abilities (creativity, for
example), and even a fair or adequate scorer can still learn to work
well with computers, given enough training and practice.

Computer Aptitude Test

Please fill out the following form to receive your user ID and password for Computer Aptitude Test. The fields written in red must be filled out. Thank you.

Computer Aptitude Test

Time remaining: 29:59

Section 1: Comparison (5 questions)

Each question in this section will ask you to make a comparison. The questions will compare things in the format "A is to B as C is to _____", and you will have to choose which option best fits in the space.

Question 1

Green is to yellow as purple is to _____.

- ☐ yellow
- ☐ green
- ☐ black
- ☐ red
- ☐ orange

Question 2

MEAT is to TEAM as 3521 is to _____.

- ☐ 1235
- ☐ 1523
- ☐ 5312
- ☐ 3251
- ☐ 2135

Question 3

Bicycle is to handlebars as car is to _____.

- ☐ steering wheel
- ☐ tire
- ☐ transmission
- ☐ rear-view mirror
- ☐ engine

Question 4

22 is to 555 as 55 is to _____.

- ☐ 999

Computer Aptitude Test

Time remaining: 28:51

Section 2: Syntax (5 questions)

In this section, you will be given a set of language characters and a list of syntax rules for the set. You will also be given a correct sample series for the language set for comparison. These language characters and syntax rules are completely arbitrary, and you should not seek a rational explanation—just follow them as they are given. Check each series of characters to make certain that all of the syntax rules have been followed. If they have, mark the question series correct. If they have not, mark the question series incorrect.

Question 1

*Questions 1 to 5 are based on the language described below.
For your convenience, this description is repeated in each of these questions.*

Language

Small set: {a b c ... z}

Large set: {A B C ... Z}

Number set: {0 1 2 3 4 5 6 7 8 9}

Syntax Rules

1. A series can have up to, but not more than, 8 characters.
2. A series cannot begin with a character from the small set.
3. A series cannot end with a character from the large set.
4. When a series ends with a character from the number set, it must be an odd number.

Correct Sample Series: Amber95

Question Series: Nineteenth

- ☐ correct
☐ incorrect

Question 2

*Questions 1 to 5 are based on the language described below.
For your convenience, this description is repeated in each of these questions.*

Language

Small set: {a b c ... z}

Large set: {A B C ... Z}

Number set: {0 1 2 3 4 5 6 7 8 9}

Computer Aptitude Test

Time remaining: 26:00

Section 3: Procedure (5 questions)

In this section you will be given a flow chart which illustrates a simple procedure. Each question will ask you to determine the logical sequence of steps in the procedure.

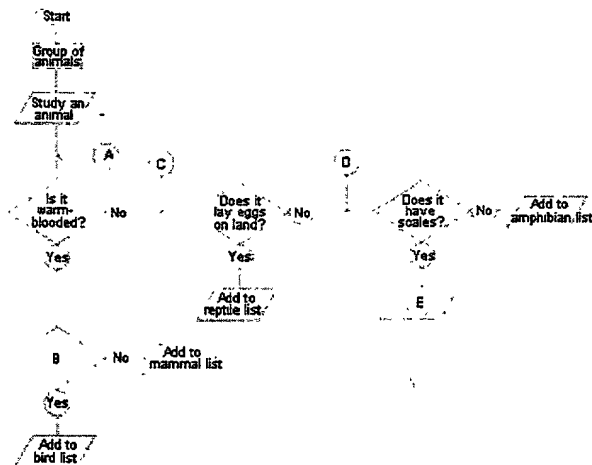

Question 1

Questions 1 to 5 are based on the flow chart shown below.

For your convenience, this flow chart is repeated in each of these questions.

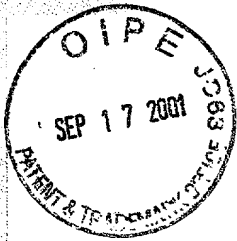

Flow Chart

You have a group of animals that you need to sort into lists of mammals, birds, fish, amphibians, and reptiles.

An animal in A _____

- ☐ is a mammal or a bird.
- ☒ could be any kind of animal.
- ☐ is most likely a mammal.
- ☐ cannot be a bird.
- ☐ is most likely not a mammal.

Computer Aptitude Test

Time remaining: 18:57

Section 5: Sequence (5 questions)

The questions in this section all involve finding patterns in a series of characters. You will be asked to choose the option which you feel best continues the pattern.

Question 1

D, D, F, D, F, S, D, F, S, L, D, _____. What comes next?

- ☐ S
- ☐ D
- ☐ B
- ☐ F
- ☐ L

Question 2

A, K, C, M, E, O, G, Q, I, _____. What comes next?

- ☐ A
- ☐ O
- ☐ S
- ☐ T
- ☐ K

Question 3

4, 16, 36, 64, _____. What comes next?

- ☐ 128
- ☐ 81
- ☐ 72
- ☐ 144
- ☐ 100

Question 4

121, 212, 221, 112, 1212, _____. What comes next?

- ☐ 1222
